

Hopco Pty Ltd

Importers of Quality Hops

BREWERS GOLD:

Brewers Notes:

Wye College produced Brewer's Gold in 1919 from an open pollination with Wild Manitoba. While it is no longer a popular hop in commercial usage due to its poor storageability, it has been used to breed many fine varieties such as the super alpha Galena, as well as Nugget, Centennial, and others. For the home brewer, Brewer's Gold is still a good choice for late bittering, with its nice spice and black currant backnotes to its flavor and aroma, and its proven vigor makes it an excellent choice for home hops growing.

Technical Data:

Purpose:	Bittering
Alpha Acid Composition:	5.5% - 7.8%
Beta Acid Composition:	2.5% - 3.5%
Co-Humulone Composition:	36% - 48%
Country:	United Kingdom
Cone Size:	Small
Cone Density:	Compact
Season Maturity:	Lates
Yield Amount:	1760-2400 kg/hectare (1570-2140 lbs/acre)
Growth Rate:	Very High
Storability:	Retains 60%-70% alpha acid after 6 months storage at 20 degrees C
Total Oil Composition:	1.8 – 2.4 mL/100g
Myrcene Oil Composition:	37% - 40%
Humulene Oil Composition:	29% - 31%
Caryophyllene Oil:	7% - 8%
Farnesene Oil:	0% - 1%
Substitutes:	Cascade, Bullion
Style Guide:	Bitter, Barley Wine, Imperial Stout
