Importers of Quality Hops

SAPHIR:

Brewers Notes:

Saphir has a refined sweet, mild citrus nose with a hint of tangerine, and is especially yummy in Belgian Whites as well as Pilsners and Lagers. Low alpha acid content and very low co-humulone. Good vigor and yield. Despite its low alpha acids, it is said to be fruity, flowery, with a bit of tang. Very good resistance to verticillium wilt and good resistance to both varieties of mildew.

Technical Data:

Purpose:	Aroma
Alpha Acid Composition:	2% - 4.5%
Beta Acid Composition:	4% - 7%
Co-Humulone Composition:	12% - 17%
