Importers of Quality Hops

STYRIAN GOLDING:

Brewers Notes:

Styrian Golding (aka Savinja Golding, Savinjski Golding, Yugoslavia Golding) is another hops variety with a confusing name because it doesn't come from a Golding at all, but rather a Fuggle and has Fuggle-like characteristics. It was a major hops crop in the 1930s in its native Styria (in Austria on the Slovenia border), and has survived due to its tolerance to mildew which helped it to hold its own amid other varieties. It is now world-renowned and in high demand. It is a lovely aroma hop with high humulene and moderate myrcene and carophyllene. Even its farnesene, although low, makes its imprint on the aroma.

Technical Data:

Purpose:	Aroma
Alpha Acid Composition:	4.5% - 6%
Beta Acid Composition:	2% - 3%
Co-Humulone Composition:	25% - 30%
Country:	Slovenia
Cone Size:	Medium
Cone Density:	Compact
Season Maturity:	Early
Yield Amount:	1150-1500 kg/hectare (1025-1330 lbs/acre)
Growth Rate:	Moderate
Storability:	Retains 65%-80%alpha acid after 6 months storage at 20 degrees C
Total Oil Composition:	0.5 - 1 mL/100g
Myrcene Oil Composition:	27% - 33%
Humulene Oil Composition:	34% - 38%
Caryophyllene Oil:	9% - 11%
Farnesene Oil:	2% - 5%
Substitutes:	Fuggle (US), Willamette
Style Guide:	Extra Special Bitter
